TERMS & CONDITIONS:

PROCEDURE: The property will be offered as a single tract & will be sold in the manner resulting in the highest total sale price.

BUYER'S PREMIUM: The contract purchase price will include a Buyer's Premium equal to 4% of the bid amount.

DOWN PAYMENT: 10% of the total contract purchase price will be due as a down payment on the day of auction, with the balance due in cash at closing. The down payment may be made in the form of cashier's check, personal check, or corporate check. YOUR BIDDING IS NOT CONDITIONAL UPON FINANCING, SO BE SURE YOU HAVE ARRANGED FINANCING, IF NEEDED, & ARE CAPABLE OF PAYING CASH AT CLOSING.

APPROVAL OF BID PRICES: The successful bidder will be required to enter into a purchase agreement at the auction site immediately following the close of the auction. The auction bids are subject to the acceptance or rejection by the Seller.

DEED: Seller shall be obligated only to convey a merchantable title by Special Warranty Deed.

EVIDENCE OF TITLE; TITLE INSURANCE: Sellers shall furnish at Seller's expense an updated title insurance commitment disclosing fee simple title to the real estate in the name of Sellers (free & clear of any material encumbrance that does not constitute a Permitted Exception) as of a date after the Auction & prior to closing, subject to all standard requirements, conditions & exceptions & subject to the Permitted Exceptions. If Buyer elects to purchase a standard coverage owner's title insurance policy in accordance with

such commitment, the cost of the owner's title insurance shall be charged to Buyer; provided, however, Seller shall give Buyer a credit at closing against the purchase price equal to one-half (1/2) of the amount charged to Buyer for the owner's title insurance, including the premium & any title service charges. The cost of any lender's title insurance shall be charged to Buyer.

CLOSING: The closing shall take place 45 days after the auction or as soon thereafter as applicable closing documents are completed by Seller.

POSSESSION: Possession shall be at closing.

REAL ESTATE TAXES: Real Estate taxes shall be prorated to the date of closing.

MINERALS: The sale of the Property will include the minerals currently owned by Seller (if any). However, no promise, warranty or representation will be made as to the existence or value of any minerals or the nature or extent of Seller's interest therein.

ACREAGE & DIMENSIONS: All acreages, dimensions & square footages are approximate & have been estimated based on current legal descriptions, property tax records and/or aerial photos. Any corrections, additions, or deletions will be made known prior to the auction.

WATER RIGHTS: All references to water rights have been based on information derived from the Arizona Department of Water Resources (ADWR). Buyers are encouraged to contact ADWR and/or engage legal counsel to fully understand Arizona Water Rights & Water Law.

PERMITTED USES/ZONING: Buyers are encouraged to thoroughly review the Tucson Unified Development Code & contact the Tucson Department of

Planning & Development Services to address any questions regarding specific permitted uses, zoning and/or subdivision matters.

AGENCY: Schrader Real Estate and Auction Company, Inc. & their representatives are exclusive agents of the Seller.

DISCLAIMER & ABSENCE OF WARRANTIES: All information contained in this brochure & all related materials are subject to the terms & conditions outlined in the Purchase Agreement. Dear Irrigation Grandfathered Right Holder:

Enclosed is an OFFICIAL NOTICE of your agricultural conservation requirements for the third management period. These conservation requirements are effective beginning in calendar year 2003 and shall remain in effect until the first compliance date of the conservation requirements established for your Irrigation Grandfathered Right in the Fourth Management Plan. **PLEASE CAREFULLY REVIEW THIS LETTER AND THE ENCLOSED NOTICE.**

The Director of the Arizona Department of Water Resources ("Director") adopted the Third Management Plan ("TMP") for the Tucson Active Management Area ("AMA") in December of 1999. As originally adopted, the TMP did not contain a Base Agricultural Conservation Program with new irrigation water duties and maximum annual groundwater allotments for farms in the AMA because of questions regarding the appropriate irrigation efficiency to use when calculating the water duties. This issue was resolved in 2002 when the Legislature enacted legislation requiring the Director to calculate the irrigation water duties for most farms in the AMA using an assigned irrigation efficiency of 80 percent. A lower assigned irrigation efficiency may be used for farms determined by the Director to have limiting soils or excessive slopes and for farms where orchard crops were historically grown and continue to be grown. The legislation also requires the Director to modify the TMP to include a Best Management Practices ("BMP") Program as an alternative to the Base Program.

In April of 2003, the Director adopted modifications to Chapter 4 of the TMP to comply with the legislation enacted in 2002. The modifications include the addition of a Base Program with irrigation water duties calculated in the manner required by the legislation and the addition of a BMP Program. The Historic Cropping Program, an alternative program that was included in the TMP as adopted in 1999, was retained in the modifications. The purpose of this notice is to inform you of the water duties and allotments established for your farm and of the availability of the alternative programs. The official language of the modification to Chapter 4 may be reviewed at the Department's website, www.water.az.gov.

I. Base Agricultural Conservation Program Water Duties and Allotments

The irrigation water duty and maximum annual groundwater allotment adopted for your farm for the Base Program are set forth in the enclosed "Notice of Irrigation Water Duty and Maximum Annual Groundwater Allotment." You must comply with the water duty and annual allotment unless you apply for and are accepted for regulation under one of the alternative agricultural conservation programs described below.

WATER REPORT FLOOD MAP

II. Alternative Agricultural Conservation Programs

There are two conservation programs available to you as alternatives to the Base Program: the BMP Program and the Historic Cropping Program. The BMP Program requires the implementation of specific agricultural conservation practices on the farm in lieu of complying with a water duty and annual allotment. Under the Historic Cropping program, the Director will calculate the water duty and annual allotment using an assigned irrigation efficiency of 75 percent. If a farm has limiting soils, the Director may use an assigned irrigation efficiency of 70 percent. Use of flex account provisions is limited under the Historic Cropping Program. An individual who wishes to be regulated under one of these alternative programs must apply on a form prescribed and furnished by the Director. The Director must approve the application before the individual can be regulated under the program.

The Director has found the Base Program irrigation water duties and maximum annual groundwater allotments established in the modifications to Chapter 4 of the TMP to be achievable for most Irrigation Grandfathered Right holders. However, there are two separate methods for seeking administrative relief from the water duty and annual allotment established for your farm if you believe you will be unable to comply with them. You may request a VARIANCE or an ADMINISTRATIVE REVIEW.

1. VARIANCE

A person who requires additional time to comply with a new conservation requirement may apply to the Director for a VARIANCE from the requirement pursuant to A.R.S. § 45-574. The Director may grant a variance for up to five years upon a showing of "compelling economic circumstances." **AN APPLICATION FOR A VARIANCE MUST BE FILED WITHIN 95 DAYS AFTER THE DATE OF THIS NOTICE.**

2. ADMINISTRATIVE REVIEW

If you feel that a conservation requirement is unreasonable as applied to you, you may apply for an ADMINISTRATIVE REVIEW of the requirement pursuant to A.R.S. § 45-575(A). **AN APPLICATION FOR AN ADMINISTRATIVE REVIEW UNDER A.R.S. § 45-575(A) MUST BE FILED WITHIN 95 DAYS AFTER THE DATE OF THIS NOTICE.** An administrative review may also be applied for at any time during the third management period if extraordinary circumstances not in existence as of the date of this notice make it unreasonable to require your compliance with a conservation requirement.

If you have any questions regarding your conservation requirements, or if you need an application form and information on one of the alternative conservation programs or on the variance and administrative review procedure, please contact the Tucson AMA office at (520) 770-3800

Sincerely,

s/Herbert R. Guenther

ARIZONA DEPARTMENT OF WATER RESOURCES TUCSON ACTIVE MANAGEMENT AREA

NOTICE OF IRRIGATION WATER DUTY AND MAXIMUM ANNUAL GROUNDWATER ALLOTMENT

Pursuant to A.R.S. § 45-572(B), the Director of the Arizona Department of Water Resources hereby gives notice of the irrigation water duty and maximum annual groundwater allotment established for the Irrigation Grandfathered Right listed below in the Third Management Plan for the TUCSON Active Management Area.

The water duty and annual allotment shall become effective beginning in calendar year 2003 and shall remain in effect until the first compliance date of the water duty and annual allotment established for the Irrigation Grandfathered Right in the Fourth Management Plan. The owner of the Irrigation Grandfathered Right and any person using groundwater pursuant to the right must comply with the water duty and annual allotment while regulated under the Base Agricultural Conservation Program in the Third Management Plan.

IRRIGATION GRANDFATHERED RIGHT NO. 58-160065.0001

ASSIGNED IRRIGATION EFFICIENCY: 80 PERCENT

IRRIGATION WATER DUTY: 5.00 ACRE-FEET PER ACRE

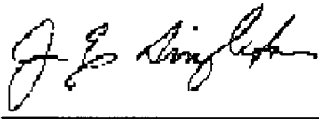

**MAXIMUM ANNUAL
GROUNDWATER ALLOTMENT: 75.00 ACRE-FEET PER YEAR**

The **irrigation water duty** is the amount of water in acre-feet per acre that is reasonably required to irrigate the crops historically grown in the farm unit to which the above-referenced Irrigation Grandfathered Right is appurtenant. The **maximum annual groundwater allotment** is the maximum amount of water that may be used in any year to irrigate the irrigation acres associated with the Irrigation Grandfathered Right, except as provided by A.R.S. 45-467, the flexibility account provision. The annual allotment is calculated by multiplying the water duty for the Irrigation Grandfathered Right by the number of water duty acres associated with the right.

January 20, 2002

Dear Groundwater Right Owner:

Enclosed are your Annual Water Withdrawal and Use Report forms for calendar year 2001. The summary page is printed on the reverse side of this letter. This report is for Grandfathered Right holders who have withdrawn groundwater from their own wells, who may have received water from others or may have delivered water to other right holders. The Department has preprinted certain information from our records onto these forms. Please pay particular attention to the schedules and worksheets. If any of the preprinted information is incorrect, please make the necessary changes. Note that a separate annual report must be filed for each right you own or lease. Separate checks should be enclosed to cover the fees associated with each right and the right number should be written on the check.

The Groundwater Code requires that each person who owns or leases a right to withdraw groundwater in an Active Management Area must file an annual report, even if no groundwater was used. Persons who did not withdraw or use water during 2001 are required to return the form(s) with zeros in the appropriate blanks and sign and date the summary page.

Reports must be received by the Department or postmarked no later than March 31, 2002.

The penalty for filing late is \$25.00 per month or part of month that the report is late up to \$150.00. In addition, if you withdrew groundwater, and did not pay the withdrawal fee on time, the penalty is 10% of the unpaid fee per month or part of a month that the fees are delinquent, up to a maximum of 60% of the unpaid balance.

The owner and/or lessee of the right as of December 31, 2001 is responsible for filing an annual report covering the entire calendar year. Please contact your local AMA office for conveyance forms and instructions.

We have tried to provide you with the proper forms according to information in our files. Failure to receive the proper forms does not relieve a person of the responsibility of keeping the required records or filing the required reports. You should keep a copy of this report for your records.

If you need help or have questions, contact your local AMA office listed at the top of the Groundwater Summary page of the report.

Sincerely,

Jim Holway
Assistant Director
Groundwater Management Division

INSTRUCTIONS - REPORT OF GROUNDWATER WITHDRAWALS

Note: If any information pre-printed on this form is incorrect, please make the needed corrections.
For that information not already pre-printed on this form, please follow the directions below.

1. Enter owner name and groundwater right or permit number, if not already shown, in **1**.
2. Enter DWR well registration number and location of each well, if not already shown, in **2**.
3. Enter power company name, account number and meter number, if not already shown, in **3**.
4. Enter device type used to measure withdrawals, if not already shown, in **4** (see list below).
5. If energy meter serves uses other than the well, indicate "Y" in **5**; if energy meter does not serve other uses (meter is dedicated to the well) indicate "N" in **5**.
6. Enter energy consumed by well and units of measure from appropriate worksheet in **6**.
7. If device types 2 through 6 are used, indicate the average discharge and divider or total hours from the appropriate worksheet in **7** and **8**.
8. Enter total acre-feet of groundwater withdrawn for each well, as calculated on attached worksheets, in **9**.
9. Enter total acre-feet of exchange groundwater pumped for each well, as calculated on attached worksheets, in **10**.
10. If applicable, adjust the total acre-feet of Exchange Groundwater for each well in **11**. This applies to noticed groundwater for groundwater exchanges for which the exchange agreement requires payback within the same year that groundwater is given.
11. Enter grand total acre-feet withdrawn in **12** and in Part I of the Summary Page.

COLUMN **4** DEVICE TYPE LEGEND

1. Pumpage measured by meter or other totalizer/recorder devices (use worksheet W-1)
2. Pipeflow with pumpage calculated using electrical energy records (use worksheet W-2)
3. Pipeflow with pumpage calculated using natural gas energy records (use worksheet W-3)
4. Open channel flow with pumpage calculated using electrical energy records (use worksheet W-4)
5. Open channel flow with pumpage calculated using natural gas energy records (use worksheet W-5)
6. Pumpage calculated using hour meters (use worksheet W-6)

MEASURING DEVICE MALFUNCTION

Pursuant to A.A.C. R12-15-906, a measuring device that fails to perform for more than seventy-two (72) hours must be reported to the Department of Water Resources within seven (7) calendar days after the discovery of the malfunction. Corrective action must be taken within 30 days, and estimates of withdrawals made during the period the device was out of service must be provided. Results of the two per year required flow-rate measurements must also be attached. A Measuring Device Malfunction Report is available on request.

Please contact your local Active Management Area if you need assistance completing this form.

INSTRUCTIONS

Note: If any information pre-printed on this form is incorrect, please make the needed corrections.
For that information not already preprinted on this form, please follow the directions below.

1. Enter DWR well registration number & location in 1.
2. If the meter has been changed during the reporting year, enter type, make, model & size of measuring device used to measure discharge in 2. If the device is permanent, enter date installed or last overhauled.
3. Enter power company name, account number, meter number if incorrect and total energy consumption in 3. Indicate units as KWH, therms or other measurement.
4. Indicate whether the electrical meter serves uses other than the well "Y" or "N" on column 4.
5. Enter initial totalizer reading as of January 1, 2001 in 5. If your meter reads in 10's, 100's, or 1000's of units, be sure to add the correct number of zeroes.
6. Enter ending reading as of December 31, 2001 in 6. If the totalizer dial has rolled over during the year, enter the number 1 in front of the reading, if twice, a 2, etc.
7. Subtract reading in 5 from reading in 6 and enter the difference in 7.
8. Convert the total amount pumped to acre feet by using the appropriate conversion; enter the results in 8.
 - If meter reads in gallons, divide 7 by 325,851
 - If meter reads in cubic feet, divide 7 by 43,560
 - If meter reads in acre-feet, no conversion is necessary
9. If your meter malfunctioned during the year, enter the estimate of withdrawals in acre-feet made during the out-of-service period in 9 and attach the results of the two per year required flow rate measurements.
10. Add 8 and 9 and enter result in 10.

ENTER THE FOLLOWING ON SCHEDULE A OR PART 1 OF SCHEDULE A-GSF

WORKSHEET W-1 SCHEDULE A

- Box 1 --- DWR well registry number & location in column 2. If not already shown.

Dear Groundwater Right Owner:

Enclosed are your Annual Water Withdrawal and Use Report forms for calendar year 2000. The summary page is printed on the reverse side of this letter. This report is for Grandfathered Right holders who have withdrawn groundwater from their own wells, who may have received water from others or may have delivered water to other right holders. The Department has preprinted certain information from our records onto these forms. Please pay particular attention to the schedules and worksheets. If any of the preprinted information is incorrect, please make the necessary changes. Note that a separate annual report must be filed for each right you own or lease. Separate checks should be enclosed to cover the fees associated with each right and the right number should be written on the check.

The Groundwater Code requires that each person who owns or leases a right to withdraw groundwater in an Active Management Area must file an annual report, even if no groundwater was used. Persons who did not withdraw or use water during 2000 are required to return the form(s) with zeros in the appropriate blanks and sign and date the summary page.

Reports must be received by the Department or postmarked no later than March 31, 2001.

The penalty for filing late is \$25.00 per month or part of month that the report is late up to \$150.00. In addition, if you withdrew groundwater, and did not pay the withdrawal fee on time, the penalty is 10% of the unpaid fee per month or part of a month that the fees are delinquent, up to a maximum of 60% of the unpaid balance.

The owner and/or lessee of the right as of December 31, 2000 is responsible for filing an annual report covering the entire calendar year. Please contact your local AMA office for conveyance forms and instructions.

We have tried to provide you with the proper forms according to information in our files. Failure to receive the proper forms does not relieve a person of the responsibility of keeping the required records or filing the required reports. You should keep a copy of this report for your records.

If you need help or have questions, contact your local AMA office listed at the top of the Groundwater Summary page of the report.

Sincerely,

INSTRUCTIONS - REPORT OF GROUNDWATER WITHDRAWALS

Note: If any information pre-printed on this form is incorrect, please make the needed corrections.
For that information not already preprinted on this form, please follow the directions below.

1. Enter owner name and groundwater right or permit number, if not already shown, in **1**.
2. Enter DWR well registration number and location of each well, if not already shown, in **2**.
3. Enter power company name, account number and meter number, if not already shown, in **3**.
4. Enter device type used to measure withdrawals, if not already shown, in **4** (see list below).
5. If energy meter serves uses other than the well, indicate "Y" in **5**; if energy meter does not serve other uses (meter is dedicated to the well) indicate "N" in **5**.
6. Enter energy consumed by well and units of measure from appropriate worksheet in **6**.
7. If device types 2 through 6 are used, indicate the average discharge and divider or total hours from the appropriate worksheet in **7** and **8**.
8. Enter total acre-feet of groundwater withdrawn for each well, as calculated on attached worksheets, in **9**.
9. Enter total acre-feet of exchange groundwater pumped for each well, as calculated on attached worksheets, in **10**.
10. If applicable, adjust the total acre-feet of Exchange Groundwater for each well in **11**. This applies to noticed groundwater for groundwater exchanges for which the exchange agreement requires payback within the same year that groundwater is given.
11. Enter grand total acre-feet withdrawn in **12** and in Part I of the Summary Page.

COLUMN **4** DEVICE TYPE LEGEND

1. Pumpage measured by meter or other totalizer/recorder devices (use worksheet W-1)
2. Pipeflow with pumpage calculated using electrical energy records (use worksheet W-2)
3. Pipeflow with pumpage calculated using natural gas energy records (use worksheet W-3)
4. Open channel flow with pumpage calculated using electrical energy records (use worksheet W-4)
5. Open channel flow with pumpage calculated using natural gas energy records (use worksheet W-5)
6. Pumpage calculated using hour meters (use worksheet W-6)

MEASURING DEVICE MALFUNCTION

Pursuant to A.A.C. R12-15-906, a measuring device that fails to perform for more than seventy-two (72) hours must be reported to the Department of Water Resources within seven (7) calendar days after the discovery of the malfunction. Corrective action must be taken within 30 days, and estimates of withdrawals made during the period the device was out of service must be provided. Results of the two per year required flow-rate measurements must also be attached. A Measuring Device Malfunction Report is available on request.

Please contact your local Active Management Area if you need assistance completing this form.

INSTRUCTIONS

Note: If any information pre-printed on this form is incorrect, please make the needed corrections.
For that information not already preprinted on this form, please follow the directions below.

1. Enter DWR well registration number & location in **1**.
2. If the meter has been changed during the reporting year, enter type, make, model & size of measuring device used to measure discharge in **2**. If the device is permanent, enter date installed or last overhauled.
3. Enter power company name, account number, meter number if incorrect and total energy consumption in **3**. Indicate units as KWH, therms or other measurement.
4. Indicate whether the electrical meter serves uses other than the well "Y" or "N" on column **4**.
5. Enter initial totalizer reading as of January 1, 2000 in **5**. If your meter reads in 10's, 100's, or 1000's of units, be sure to add the correct number of zeroes.
6. Enter ending reading as of December 31, 2000 in **6**. If the totalizer dial has rolled over during the year, enter the number 1 in front of the reading, if twice, a 2, etc.
7. Subtract reading in **5** from reading in **6** and enter the difference in **7**.
8. Convert the total amount pumped to acre feet by using the appropriate conversion; enter the results in **8**.
 - If meter reads in gallons, divide **7** by 325,851
 - If meter reads in cubic feet, divide **7** by 43,560
 - If meter reads in acre-feet, no conversion is necessary
9. If your meter malfunctioned during the year, enter the estimate of withdrawals in acre-feet made during the out-of-service period in **9** and attach the results of the two per year required flow rate measurements.
10. Add **8** and **9** and enter result in **10**.

ARIZONA DEPARTMENT OF WATER RESOURCES

JANE DEE HULL
Governor

RITA P. PEARSON
Director

January 20, 2000

Dear Groundwater Right Owner:

Enclosed are your Annual Water Withdrawal and Use Report forms for calendar year 1999. The summary page is printed on the reverse side of this letter. This report is for Grandfathered Right holders who have withdrawn groundwater from their own wells, who may have received water from others or may have delivered water to other right holders. The Department has preprinted certain information from our records onto these forms. Please pay particular attention to the schedules and worksheets. If any of the preprinted information is incorrect, please make the necessary changes. Note that a separate annual report must be filed for each right you own or lease. Separate checks should be enclosed to cover the fees associated with each right and the right number should be written on the check.

The Groundwater Code requires that each person who owns or leases a right to withdraw groundwater in an **Active Management Area** must file an annual report, even if no groundwater was used. Persons who did not withdraw or use water during 1999 are required to return the form(s) with zeros in the appropriate blanks and sign and date the summary page.

Reports must be received by the Department or postmarked no later than March 31, 2000.

The penalty for filing late is \$25.00 per month or part of month that the report is late up to \$150.00. In addition, if you withdrew groundwater, and did not pay the withdrawal fee on time, the penalty is 10% of the unpaid fee per month or part of a month that the fees are delinquent, up to a maximum of 60% of the unpaid balance.

If your water right has been sold, then both the buyer and seller are responsible for notifying the Department of the conveyance. **The owner and/or lessee of the right as of December 31, 1999 is responsible for filing an annual report covering the entire calendar year.** Please contact your local AMA office for conveyance forms and instructions.

We have tried to provide you with the proper forms according to information in our files. Failure to receive the proper forms does not relieve a person of the responsibility of keeping the required records or filing the required reports. You should keep a copy of this report for your records.

If you need help or have questions, contact your local AMA office listed at the top of the Groundwater Summary page of the report.

Sincerely,

A handwritten signature in cursive script that reads "Jim Holway".

For that information not already preprinted on this form, please follow the directions below.

Enter owner name and groundwater right number, if not already shown, in **1**

Enter DWR well registration number and location of each well, if not already shown, in **2**

Enter power company name, account number and meter number, if not already shown, in **3**

Enter device type used to measure withdrawals, if not already shown, in **4** (see list below)

If energy meter serves uses other than the well, indicate "Y" in **5** ; if energy meter does not serve other uses (meter is dedicated to the well) indicate "N" in **5**

Enter energy consumed by well and units of measure from appropriate worksheet in **6**

If device types 2 through 6 are used, indicate the average discharge and divider or total hours from the appropriate worksheet in **7** and **8**

Enter total acre-feet of groundwater withdrawn for each well, as calculated on attached worksheets, in **9**

Enter total acre-feet of exchange groundwater pumped for each well, as calculated on attached worksheets, in **10**

If applicable, adjust the total acre-feet of Exchange Groundwater for each well in **11**. This applies to noticed groundwater for groundwater exchanges for which the exchange agreement requires payback within the same calendar year that groundwater is given.

Enter grand total acre-feet withdrawn in **12** and in Part I of the Summary Page.

DEVICE TYPE

6. Pumpage calculated using hour meters (use worksheet W-6)

MEASURING DEVICE MALFUNCTION

Pursuant to A.A.C. R12-15-906, a measuring device that fails to perform for more than seventy-two (72) hours must be reported to the Department of Water Resources within seven (7) calendar days after the discovery of the malfunction. Corrective action must be taken within 30 days, and estimates of withdrawals made during the period the device was out of service must be provided. Results of the two per year required flow-rate measurements must also be attached. A measuring Device Malfunction Report is available on request.

ARIZONA DEPARTMENT OF WATER RESOURCES

JANE DEE HULL
Governor

RITA P. PEARSON
Director

January 20, 1999

Dear Groundwater Right Owner:

Enclosed are your Annual Water Withdrawal and Use Report forms for calendar year 1998. The summary page is printed on the reverse side of this letter. This report is for Grandfathered Right holders who have withdrawn groundwater from their own wells, who may have received water from others or may have delivered water to other right holders. The Department has preprinted certain information from our records onto these forms. Please pay particular attention to the schedules and worksheets. If any of the preprinted information is incorrect, please make the necessary changes. Please note that a separate annual report must be filed for each right you own or lease. Separate checks should be enclosed to cover the fees associated with each right and the right number should be written on the check.

The Groundwater Code requires that each person who owns or leases a right to withdraw groundwater in an **Active Management Area** must file an annual report, even if no groundwater was used. Persons who did not withdraw or use water during 1998 are required to return the forms with zeros in the appropriate blanks.

Reports must be received by the Department or postmarked no later than March 31, 1999.

The penalty for filing late is \$25.00 per month or part of month that the report is late up to \$150.00. In addition, if you withdrew groundwater, and did not pay the fee on time or did not pay the proper fee the penalty is 10% of the unpaid fee per month or part of a month that the fees are delinquent, up to a maximum of 60% of the unpaid balance.

If your water right has been sold, then both the buyer and seller are responsible for notifying the Department of the conveyance. **The owner and/or lessee of the right as of December 31, 1998 is responsible for filing an annual report covering the entire calendar year.** Please contact your local AMA office for conveyance forms and instructions.

We have tried to provide you with the proper forms according to information in our files. The law does specify, however, that failure to receive the proper forms does not relieve a person of the responsibility of keeping the required records or filing the required reports. You may want to keep a copy of this report for your records.

If you need help or have questions, contact your local AMA office listed at the top of the Groundwater Summary page of the report.

Sincerely,

Jim Holway

Assistant Director
Groundwater Management Division

For that information not already preprinted on this form, please follow the directions below.

Enter owner name and groundwater right number, if not already shown, in

Enter DWR well registration number and location of each well, if not already shown, in

Enter power company name, account number and meter number, if not already shown, in

Enter device type used to measure withdrawals, if not already shown, in (see list below)

If energy meter serves uses other than the well, indicate "Y" in ; if energy meter does not
serve other uses (meter is dedicated to the well) indicate "N" in

Enter energy consumed by well and units of measure from appropriate worksheet in

If device types 2 through 6 are used, indicate the average discharge and divider or total hours
from the appropriate worksheet in and

Enter total acre-feet of groundwater withdrawn for each well, as calculated on attached
worksheets, in

Enter total acre-feet of exchange groundwater pumped for each well, as calculated on attached
worksheets, in

If applicable, adjust the total acre-feet of Exchange Groundwater for each well in . This applies to
noticed groundwater for groundwater exchanges for which the exchange agreement requires payback
within the same calendar year that groundwater is given.

Enter grand total acre-feet withdrawn in and in Part I of the Summary Page.

6. Pumpage calculated using hour meters (use worksheet W-6)

MEASURING DEVICE MALFUNCTION

Pursuant to A.A.C. R12-15-906, a measuring device that fails to perform for more than seventy-two (72) hours must be reported to the Department of Water Resources within seven (7) calendar days after the discovery of the malfunction. Corrective action must be taken within 30 days, and estimates of withdrawals made during the period the device was out of service must be provided. Results of the two per year required flow-rate measurements must also be attached. A measuring Device Malfunction Report is available on request.

INSTRUCTIONS

1. Enter DWR Well Registration No. & Location in 1.
2. If the meter has been changed during the reporting year, enter type, make, model & size of measuring device used to measure discharge in 2. If the device is permanent, enter date installed or last overhauled.
3. Enter power company name, account number, meter number and total energy consumption in 3. Indicate units as KWH, therms or other measurement.
4. Indicate whether the energy meter serves other uses in 4.
5. Enter initial totalizer reading as of January 1, in 5. If your meter reads in 10's, 100's, or 1000's of units, be sure to add the correct number of zeroes.
6. Enter ending reading as of December 31, in 6. If the totalizer dial has rolled over during the year, enter the number 1 in front of the reading, if twice, a 2, etc.
7. Subtract reading in 5 from reading in 6 and enter the difference in 7.
8. Convert the Total Amount Pumped to acre feet by using the appropriate conversion; enter the results in 8.
 - If meter reads in gallons, divide 7 by 325,851
 - If meter reads in cubic feet, divide 7 by 43,560
 - If meter reads in acre feet, no conversion is necessary
9. If your meter malfunctioned during the year, enter the estimate of withdrawals in acre feet made during the out-of-service period in 9 and attach the results of the two required flow rate measurements.
10. Add 8 and 9 and enter result in 10.

Director

Dear Irrigation Grandfathered Rightholder:

Enclosed is an OFFICIAL NOTICE of your final agricultural conservation requirements for the second management period. These requirements will become effective on January 1, 2000.

PLEASE CAREFULLY REVIEW THE ENCLOSED REQUIREMENTS.

In December of 1989, the Director of the Arizona Department of Water Resources ("Director") adopted the Second Management Plan (SMP) for the Tucson Active Management Area (AMA). The SMP was adopted in accordance with Arizona's Groundwater Code, which requires the Director to establish a continuing mandatory conservation program for all persons withdrawing, distributing or using groundwater within the AMA.

For irrigation grandfathered rightholders, the Groundwater Code mandates the establishment of new irrigation water duties to be reached by the end of the second management period, and authorizes the Director to establish intermediate water duties to be reached at specified intervals during the second management period. The Groundwater Code provides that a farm's irrigation water duty must be calculated as the quantity of water reasonably required to irrigate the crops historically grown in the farm unit, and must assume maximum conservation consistent with prudent long-term farm management practices within areas of similar farming conditions, considering the time required to amortize conservation investments and financing costs. In addition, the Groundwater Code provides that the maximum annual groundwater allotment is the maximum amount of water that may be used in any year to irrigate the irrigation acres associated with the irrigation grandfathered right, except as provided in A.R.S. § 45-467, the flexibility account provision.

Irrigation grandfathered rightholders were first given written notice of their intermediate and final irrigation water duties and maximum annual groundwater allotments for the second management period within thirty days after the SMP was adopted. Additional written notice of the second intermediate irrigation water duties and maximum annual groundwater allotments was given in late 1992.

The enclosed notice is being sent to you to give you additional notice of the final irrigation water duty and maximum annual groundwater allotment for your farm, which will become effective on January 1, 2000. The final water duty and allotment set forth in this notice reflect any adjustments which may have been granted pursuant to an administrative review request filed following the original notification of the SMP conservation requirements.

WATER REPORT FLOOD MAP

The final SMP water duty and allotment will remain in effect until the first compliance date for the irrigation water duties and maximum annual groundwater allotments established for your farm in the Third Management Plan (TMP). The Arizona Department of Water Resources ("Department") is currently in the process of developing the TMP conservation requirements. You will be notified of those requirements within thirty days after the TMP is adopted.

VARIANCE

The Department considers the final irrigation water duties and maximum annual groundwater allotments established in the SMP to be achievable by most farms by the year 2000. However, if you believe you will need additional time to comply with the final water duty and allotment established for your farm, you may apply for a variance from the water duty and allotment.

A variance from a final water duty and allotment may be granted for up to five years if there are "compelling economic circumstances" preventing timely compliance with the water duty and allotment. In order to obtain a variance, an applicant must prove that the applicant's economic circumstances prevent compliance with the final water duty and allotment by the year 2000. In determining whether to grant a variance, the Department will take into consideration the applicant's flexibility account balance. Any decision made on the application will be appealable to the Office of Administrative Hearings.

IF YOU WISH TO APPLY FOR A VARIANCE FROM THE FINAL WATER DUTY AND ALLOTMENT YOU MUST SUBMIT A COMPLETED VARIANCE APPLICATION FORM TO THE DEPARTMENT WITHIN 95 DAYS AFTER THE DATE OF THIS NOTICE. Application forms and information on the variance procedure are available at the Tucson office.

If you have any questions regarding your conservation requirements or if you need an application form and information on the variance procedure, please contact the Tucson AMA at (520) 770-3800.

Sincerely,

Rita P. Pearson
Director

STATE OF ARIZONA
DEPARTMENT OF WATER RESOURCES
TUCSON ACTIVE MANAGEMENT AREA

**NOTICE OF FINAL IRRIGATION WATER DUTY
AND MAXIMUM ANNUAL GROUNDWATER ALLOTMENT**

Pursuant to Arizona Revised Statutes (A.R.S.) § 45-565(C), the Director of the Arizona Department of Water Resources hereby gives additional notice of the final irrigation water duty and maximum annual groundwater allotment for the Second Management Period for:

IRRIGATION GRANDFATHERED RIGHT CERTIFICATE NO. 58-160065.0001

The following is the final irrigation water duty and maximum annual groundwater allotment for the above-referenced irrigation grandfathered right. The water duty and allotment shall become effective beginning in calendar year 2000, and shall remain in effect until the first compliance date of the water duties and maximum annual groundwater allotments established for the irrigation grandfathered right in the Third Management Plan.

IRRIGATION WATER DUTY:	4.71	ACRE-FEET PER ACRE
MAXIMUM ANNUAL GROUNDWATER ALLOTMENT:	70.65	ACRE-FEET PER YEAR

The **irrigation water duty** is the amount of water in acre-feet per acre that is reasonably required to irrigate the crops historically grown in the farm unit to which the above-referenced irrigation grandfathered right is appurtenant. The **maximum annual groundwater allotment** is the maximum amount of water that may be used in any year to irrigate the irrigation acres associated with the irrigation grandfathered right, except as provided in A.R.S. § 45-467, the flexibility account provision. The maximum annual groundwater allotment is calculated by multiplying the final irrigation water duty for the irrigation grandfathered right by the number of water duty acres associated with the irrigation grandfathered right. You were previously noticed of these requirements.

Director

January 15, 1997

Dear Groundwater Right Owner:

Enclosed are your Annual Water Withdrawal and Use Report forms for calendar year 1996. These forms are printed on the reverse side of this letter. This report is for Grandfathered Right holders who have withdrawn groundwater from their own wells, who may have received water from others or may have delivered water to other right holders. The Department has preprinted certain information from our records onto these forms. Please pay particular attention to the schedules and worksheets. If any of the preprinted information is incorrect, please make the necessary changes. Please note that a separate annual report must be filed for each right you own or lease. Separate checks should be enclosed to cover the fees associated with each right and the right number should be written on the check.

The Groundwater Code requires that each person who owns or leases a right to withdraw groundwater in an **Active Management Area** must file an annual report, even if no groundwater was used. Persons who did not withdraw or use water during 1996 are required to return the forms with zeros in the appropriate blanks.

Reports must be received by the Department or postmarked no later than March 31, 1997. The penalty for filing late is \$25.00 per month or part of a month that the report is late up to \$150.00. In addition, if you withdrew groundwater, and did not pay the fee on time or did not pay the proper fee, the penalty is 10% of the unpaid fee per month or part of a month that the fees are delinquent, up to a maximum of 60% of the unpaid balance.

If your water right has been sold, both the buyer and seller are responsible for notifying the Department of the conveyance. **The owner and/or lessee of the right as of December 31, 1996 is responsible for filing an annual report covering the entire calendar year.** Please contact your AMA office for conveyance forms and instructions.

We have tried to provide you with the proper forms according to information in our files. The law does specify, however, that failure to receive the proper forms does not relieve a person of the responsibility of keeping the required records or filing the required reports. You may want to copy this report for your records.

If you need help or have questions, contact your AMA office listed at the top of the Groundwater Summary page of the report.

Sincerely,

Jim Holway
Assistant Director
Groundwater Management Division

RITA P. PEARSON
Director

January 15, 1996

Dear Groundwater Right Owner:

Enclosed are your Annual Water Withdrawal and Use Report forms for calendar year 1995. These forms are printed on the reverse side of this letter. This report is for Grandfathered Right holders who have withdrawn groundwater from their own wells, who may have received water from others or may have delivered water to other right holders. The Department has preprinted certain information from our records onto these forms. Please pay particular attention to the schedules and worksheets. If any of the preprinted information is incorrect, please make the necessary changes. Please note that a separate annual report must be filed for each right you own or lease. Separate checks should be enclosed to cover the fees associated with each right and the right number should be written on the check.

The Groundwater Code requires that each person who owns or leases a right to withdraw groundwater in an **Active Management Area** must file an annual report, even if no groundwater was used. Persons who did not withdraw or use water during 1995 are required to return the forms with zeros in the appropriate blanks.

Since the deadline of March 31 occurs on a Sunday this year, reports received by the Department or postmarked no later than April 1, 1996 will be considered timely. The penalty for filing late is \$25.00 per month or part of a month that the report is late up to \$150.00. In addition, if you withdrew groundwater, and did not pay the fee on time or did not pay the proper fee, the penalty is 10% of the unpaid fee per month or part of a month that the fees are delinquent, up to a maximum of 60% of the unpaid balance.

If your water right has been sold, both the buyer and seller are responsible for notifying the Department of the conveyance. **The owner and/or lessee of the right as of December 31, 1995 is responsible for filing an annual report covering the entire calendar year.** Please contact your AMA office for conveyance forms and instructions.

We have tried to provide you with the proper forms according to information in our files. The law does specify, however, that failure to receive the proper forms does not relieve a person of the responsibility of keeping the required records or filing the required reports. You may want to copy this report for your records.

If you need help or have questions, contact your AMA office listed at the top of the Groundwater Summary page of the report.

Sincerely,

Herb Dishlip
Assistant Director
Statewide Water Planning &
Legal Services Division

Dear Groundwater Right Owner:

Enclosed are your Annual Water Withdrawal and Use Report forms for calendar year 1994. These forms are printed on the reverse side of this letter. This report is for Grandfathered Right holders who have withdrawn groundwater from their own wells, who may have received water from others or may have delivered water to other right holders. The Department has preprinted certain information from our records onto these forms. Please pay particular attention to the schedules and worksheets. If any of the preprinted information is incorrect, please make the necessary changes. Please note that a separate annual report must be filed for each right you own or lease. Separate checks should be enclosed to cover the fees associated with each right and the right number should be written on the check.

The Groundwater Code requires that each person who owns or leases a right to withdraw groundwater in an **Active Management Area** must file an annual report, even if no groundwater was used. Persons who did not withdraw or use water during 1994 are required to return the forms with zeros in the appropriate blanks.

Reports must be received by the Department or postmarked no later than March 31, 1995. The penalty for filing late is \$25.00 per month or part of a month that the report is late up to \$150.00. In addition, if you withdrew groundwater, and did not pay the fee on time or did not pay the proper fee, the penalty is 10% of the unpaid fee per month or part of a month that the fees are delinquent, up to a maximum of 60% of the unpaid balance.

If your water right has been sold, both the buyer and seller are responsible for notifying the Department of the conveyance. **The owner and/or lessee of the right as of December 31, 1994 is responsible for filing an annual report covering the entire calendar year.** Please contact your AMA office for conveyance forms and instructions.

We have tried to provide you with the proper forms according to information in our files. The law does specify, however, that failure to receive the proper forms does not relieve a person of the responsibility of keeping the required records or filing the required reports. You may want to copy this report for your records.

If you need help or have questions, contact your AMA office listed at the top of the Groundwater Summary page of the report.

ARIZONA DEPARTMENT OF WATER RESOURCES

15 South 15th Avenue, Phoenix, Arizona 85007

FIFE SYMINGTON
Governor

RITA P. PEARSON
Director

January 15, 1994

Dear Groundwater Right Owner:

Enclosed are your Annual Water Withdrawal and Use Report forms for calendar year 1993. This report is for Grandfathered Right and Permit holders who have withdrawn groundwater from their own wells, who may have received water from others or may have delivered water to other right holders. The Department has preprinted certain information from our records onto these forms. Please pay particular attention to the schedules and worksheets. If any of the preprinted information is incorrect, please make the necessary changes. Please note that a separate annual report must be filed for each right you own or lease. Separate checks should be enclosed to cover the fees associated with each right and the right number should be written on the check.

The Groundwater Code requires that each person who owns or leases a right to withdraw groundwater in an **Active Management Area** must file an annual report, even if no groundwater was used. Persons who did not withdraw or use water during 1993 are required to return the forms with zeros in the appropriate blanks.

Reports must be received by the Department or postmarked no later than March 31, 1994. The penalty for filing late is \$25.00 per month or part of a month that the report is late up to \$150.00. In addition, if you withdrew groundwater, and did not pay the fee on time or did not pay the proper fee, the penalty is 10% of the unpaid fee per month or part of a month that the fees are delinquent, up to a maximum of 60% of the unpaid balance.

If your water right has been sold, both the buyer and seller are responsible for notifying the Department of the conveyance. **The owner and/or lessee of the right as of December 31, 1993 is responsible for filing an annual report covering the entire calendar year.** Please contact your AMA office for conveyance forms and instructions.

We have tried to provide you with the proper forms according to information in our files. The law does specify, however, that failure to receive the proper forms does not relieve a person of the responsibility of keeping the required records or filing the required reports. You may want to copy this report for your records.

If you need help or have questions, contact your AMA office listed at the top of the Groundwater Summary page of the report.

Sincerely,

Herb Dishlip
Deputy Director
Water Management

INSTRUCTIONS

If any information pre-printed on this form is incorrect, please make the needed corrections.
For that information not already preprinted on this form, please follow the directions below.

Enter owner name and groundwater right number, if not already shown, in **1**

Enter DWR well registration number and location of each well, if not already shown, in **2**

Enter power company name, account number and meter number, if not already shown, in **3**

Enter device type used to measure withdrawals, if not already shown, in **4** (see list below).

If energy meter serves uses other than the well, indicate "Y" in **5**; if energy meter does not serve other uses (meter is dedicated to the well) indicate "N" in **5**

Enter energy consumed by well and units of measure from appropriate worksheet in **6**

If device types 2 through 6 are used, indicate the average discharge and divider or total hours from the appropriate worksheet in **7** and **8**

Enter total acre-feet of groundwater withdrawn for each well, as calculated on attached worksheets, in **9**

Enter grand total acre-feet withdrawn in **10** and in Part I of the Summary Page.

TYPE

1. Pumpage measured by meter or other totalizer/recorder devices (use worksheet W-1)
2. Pipeflow with pumpage calculated using electrical energy records (use worksheet W-2)
3. Pipeflow with pumpage calculated using natural gas energy records (use worksheet W-3)
4. Open channel flow with pumpage calculated using electrical energy records (use worksheet W-4)
5. Open channel flow with pumpage calculated using natural gas energy records (use worksheet W-5)
6. Pumpage calculated using hour meters (use worksheet W-6)

MEASURING DEVICE MALFUNCTION

Pursuant to A.C.R.R. R12-15-905, a measuring device that fails to perform for more than seventy two (72) hours must be reported to the Department of Water Resources within seven (7) calendar days after the discovery of the malfunction. Corrective action must be taken within 30 days, and estimates of withdrawals made during the period the device was out of service must be provided. A Measuring Device Malfunction Report is available on request.

NOTE: A WORKSHEET MUST BE ATTACHED FOR EACH WELL FROM WHICH WATER WAS WITHDRAWN.

MEASURING DEVICE MALFUNCTION

Pursuant to A.C.R.R. R12-15-905, a measuring device that fails to perform for more than seventy two (72) hours must be reported to the Department of Water Resources within seven (7) calendar days after the discovery of the malfunction. Corrective action must be taken as soon as practicable, and estimates of withdrawals made during the period the device was out of service must be provided. A Measuring Device Malfunction Report is available on request.

NOTICE OF IRRIGATION WATER DUTY
AND MAXIMUM ANNUAL GROUNDWATER ALLOTMENT

Pursuant to A.R.S. § 45-565.B., the Director of the Department of Water Resources hereby gives notice of irrigation water duties and the maximum annual groundwater allotments for:

IRRIGATION GRANDFATHERED RIGHT CERTIFICATE NO. 58-160065.0001

for the Second Management Period, 1990 to 2000. The irrigation water duty is the amount of water in acre-feet per acre that is reasonable to apply to irrigated land in a farm unit during the accounting period. The maximum annual groundwater allotment is the maximum amount of water that may be used to irrigate the above-referenced Grandfathered Right, except as provided in A.R.S. § 45-467, the operating flexibility account provision.

In accordance with A.R.S. § 45-565.A.1., the Department has established two (2) intermediate water duties, two (2) intermediate maximum annual water allotments, one (1) final water duty and (1) final maximum annual water allotment as follows:

Beginning calendar year 1992 and for each calendar year through the calendar year 1994:

IRRIGATION WATER DUTY: **5.48 ACRE-FEET PER ACRE.**

MAXIMUM ANNUAL GROUNDWATER ALLOTMENT: **82.20 ACRE-FEET PER YEAR.**

Beginning calendar year 1995 and for each calendar year through the calendar year 1999:

IRRIGATION WATER DUTY: **5.06 ACRE-FEET PER ACRE.**

MAXIMUM ANNUAL GROUNDWATER ALLOTMENT: **75.90 ACRE-FEET PER YEAR.**

Beginning calendar year 2000 and for each calendar year until the first compliance date of any Third Management Plan requirement:

IRRIGATION WATER DUTY: **4.71 ACRE-FEET PER ACRE.**

MAXIMUM ANNUAL GROUNDWATER ALLOTMENT: **70.65 ACRE-FEET PER YEAR.**

Attachment A to this notice sets forth the official language of the above requirements for holders of irrigation grandfathered rights as adopted in the second management plan for the TUCSON Active Management Area. Attachment A is incorporated into this notice by reference. Compliance with the irrigation water duty and maximum annual groundwater

NOTICE OF IRRIGATION WATER DUTY AND MAXIMUM ANNUAL GROUNDWATER ALLOTMENT

Pursuant to A.R.S. § 45-564.B, the Director of Water Resources hereby gives notice of the irrigation water duty and the maximum annual groundwater allotment for Irrigation Grandfathered Right Certificate No. 58- 160065.0001. The maximum annual groundwater allotment is the maximum amount of groundwater that may be used per year to irrigate the lands described in the above-referenced Certificate of Irrigation Grandfathered Right, except as provided in A.R.S. § 45-467, the operating flexibility account provision.

IRRIGATION WATER DUTY 5.48 ACRE-FEET PER ACRE.

MAXIMUM ANNUAL GROUNDWATER ALLOTMENT 82.20 ACRE-FEET PER YEAR.

Attachment A to this notice sets forth the official language of the above requirements for holders of grandfathered rights as adopted in the first management plan for the Tucson Active Management Area. Attachment A is incorporated into this notice by reference. The requirement to comply with the irrigation water duty and maximum annual groundwater allotment became effective January 1, 1987 and must be maintained until the effective date of any new irrigation water duty established in the second management plan for Tucson Active Management Area.

WATER REPORT FLOOD MAP

December 28, 1992

ARNELL PATRICIA C
4491 E FT LOWELL RD
TUCSON AZ 85712

Dear Irrigation Grandfathered Right Holder;

Enclosed is an OFFICIAL NOTICE of your agricultural conservation requirements for the second management period (1990 to 2000). It is important that you review and understand the enclosed requirements.

Effective December 1989, the Arizona Department of Water Resources adopted the Second Management Plan (SMP) for the TUCSON Active Management Area (AMA). The plan establishes conservation requirements for the second management period (1990 to 2000). Requirements include two intermediate water duties and intermediate maximum annual groundwater allotments and a final water duty and final maximum annual groundwater allotment.

The first intermediate requirements became effective in calendar year 1992. Second intermediate requirements must be achieved beginning with calendar year 1995. The final requirements will become effective beginning with calendar year 2000 and will continue until the compliance date of the Third Management Plan requirements. You were previously given written notice of all of your conservation requirements for the second management period following adoption of the SMP. The purpose of this Notice is to again inform you of the second intermediate requirements that will become effective January 1, 1995.

VARIANCES

The SMP was written in accordance with Arizona's Groundwater Code which mandates establishment of maximum conservation requirements consistent with prudent long term farm management practices. The Department considers these requirements to be achievable by most water users. However, if you believe you will be unable to comply with the second intermediate conservation requirements, you may request a VARIANCE.

A VARIANCE may be granted for up to five years if there are "compelling economic circumstances" preventing the timely compliance with the conservation requirements assigned to your irrigation right. Applications for a Variance must be filed within 95 days after the date of this notice.

Application forms and information on the VARIANCE procedure will be available at the TUCSON AMA office after January 1, 1993.

WATER REPORT FLOOD MAP

VARIANCE applications for the final conservation requirements of the SMP will not be accepted at this time. You will be given an opportunity to apply for a VARIANCE from the final conservation requirements after you have been given additional notice of those requirements at the end of 1997.

ADMINISTRATIVE REVIEWS

You (or a previous owner) were provided an opportunity to file for an ADMINISTRATIVE REVIEW of all of your conservation requirements for the second management period within 90 days after receipt of the original notice of the requirements following adoption of the SMP. The ADMINISTRATIVE REVIEW process was designed to correct any technical, factual or legal errors made in establishing the SMP conservation requirements.

No new applications for ADMINISTRATIVE REVIEW will be accepted at this time, except as allowed under A.R.S. § 45-575.B. The language of A.R.S. § 45-575.B allows for the filing of an application for ADMINISTRATIVE REVIEW at any time during the second management period if extraordinary circumstances, which were not in existence as of the date of the original SMP conservation notice, make it unreasonable to require compliance with the conservation requirements.

If you have any questions regarding your conservation requirements or if you need an application form and information on the VARIANCE procedure, please contact Mike Caporaso at the Tucson AMA, 628-6758.

Sincerely,

Elizabeth Ann Rieke

NOTICE OF IRRIGATION WATER DUTY AND MAXIMUM ANNUAL GROUNDWATER ALLOTMENT

Pursuant to A.R.S. § 45-565., the Director of the Department of Water Resources hereby gives notice of irrigation water duties and the maximum annual groundwater allotments for the Second Management Period, 1990 to 2000 for:

IRRIGATION GRANDFATHERED RIGHT CERTIFICATE NO. 58-160065.0001

The irrigation water duty is the amount of water in acre-feet per acre that is reasonable to apply to irrigated land in a farm unit during the accounting period. The maximum annual groundwater allotment is the maximum amount of water that may be used to irrigate the above-referenced Grandfathered Right, except as provided in A.R.S. § 45-467, the flexibility account provision.

In accordance with A.R.S. § 45-565.A.1., the Department has established two (2) intermediate water duties, two (2) intermediate maximum annual water allotments, one (1) final water duty and (1) final maximum annual water allotment as follows:

Beginning calendar year 1992 and for each calendar year through calendar year 1994:

IRRIGATION WATER DUTY:	5.48 ACRE-FEET PER ACRE.
MAXIMUM ANNUAL GROUNDWATER ALLOTMENT:	82.20 ACRE-FEET PER YEAR.

Beginning calendar year 1995 and for each calendar year through calendar year 1999:

IRRIGATION WATER DUTY:	5.06 ACRE-FEET PER ACRE.
MAXIMUM ANNUAL GROUNDWATER ALLOTMENT:	75.90 ACRE-FEET PER YEAR.

Beginning calendar year 2000 and for each calendar year until the first compliance date of any Third Management Plan requirements:

IRRIGATION WATER DUTY:	4.71 ACRE-FEET PER ACRE.
MAXIMUM ANNUAL GROUNDWATER ALLOTMENT:	70.65 ACRE-FEET PER YEAR.

Dear Industrial User:

This is an OFFICIAL NOTICE that the Director of the Arizona Department of Water Resources (Director) has issued a Final Order adopting the management plan for the Tucson Active Management Area (TAMA) for the fourth management period, (4MP). This is also an Official Notice of the conservation requirements and monitoring and reporting requirements established in the 4MP for industrial users, which will become effective on January 1, 2019. **PLEASE CAREFULLY REVIEW THIS NOTICE AND THE ENCLOSED REQUIREMENTS.**

On July 27, 2016, the Director issued a Final Order adopting the 4MP. The 4MP was adopted in accordance with Arizona's Groundwater Code (Code) which requires the Director to establish continuing mandatory conservation programs for all persons withdrawing, distributing or using groundwater within the TAMA. For industrial users, the Code requires the Director to develop a conservation program that requires the use of, or establishes conservation requirements based on the use of, the latest commercially available conservation technology consistent with reasonable economic return.

As required by the Code, the 4MP contains general conservation requirements and monitoring and reporting requirements that apply to all industrial users (4MP, sections 6-1501 through 6-1504). Additional specific requirements have been established for the following industrial users: turf-related facilities (4MP, sections 6-1601 through 6-1605), sand and gravel facilities (4MP, sections 6-1701 through 6-1703), metal mining facilities (4MP, sections 6-1801 through 6-1807), large-scale power plants (4MP, sections 6-1901 through 6-1904), large-scale cooling facilities (4MP, sections 6-2001 through 6-2003), dairy operations (4MP, sections 6-2101 through 6-2105), and new large landscape users (4MP, sections 6-2201 through 6-2203). The 4MP also contains specific conservation requirements for new large industrial users (industrial users that begin using more than 100 acre-feet of water per year for industrial purposes after January 1, 2019) (4MP, sections 6-2301 and 6-2302).

As a person who uses water for a non-irrigation use and that water is not supplied by a city, town or private water company, you are an industrial user. Beginning on January 1, 2019 and continuing until the first compliance date for any substitute requirements in the Fifth Management Plan, you are required to comply with the conservation requirements and monitoring and reporting requirements for all industrial users in sections 6-1501 through 6-1504 of the 4MP. Those sections are enclosed herein as Attachment

58-102237.0001

TYPE 2 WATER RIGHTS REPORT

C and are incorporated into this notice by reference.

If your facility produces sand and gravel and uses more than 100 acre-feet of water per calendar year, you are required to comply with the conservation requirements and monitoring and reporting requirements for sand and gravel facilities in sections 6-1701, 6-1702 and 6-1703 of the 4MP. If those sections apply to you, they are enclosed herein as Attachment C2 and are incorporated into this notice by reference. If applicable, you must comply with the conservation requirements set forth in Attachment C2 beginning January 1, 2019 and continuing until the first compliance date for any substitute requirements in the Fifth Management Plan.

If you are a facility that processes metallic ores and uses more than 500 acre-feet of water per calendar year, you are required to comply with the conservation requirements and monitoring and reporting requirements for metal mining facilities in section 6-1801, 6-1806, and 6-1807 of the 4MP. If those sections apply to you, they are enclosed herein as Attachment C3 and are incorporated into this notice by reference. If your metal mining facility is a pre-1985 metal mining facility, you are required to comply with the conservation requirements contained in section 6-1802. If your metal mining facility is a post-1984 metal mining facility, you are required to comply with the conservation requirements contained in section 6-1803. If applicable, you must comply with the conservation requirements set forth in Attachment C3 beginning January 1, 2019 and continuing until the first compliance date for any substitute requirements in the Fifth Management Plan.

If you are an industrial user who uses groundwater at a large scale power plant that produces or is designed to produce more than 25 megawatts of electricity, including a steam electric power plant, or a combustion turbine plant, you are required to comply with the applicable conservation requirements in sections 6-1904 of the 4MP. If those sections apply to you, they are enclosed herein as Attachment C4 and incorporated herein by reference. If your large scale power plant produces or is designed to produce more than 25 megawatts of electricity by utilizing the Rankin Steam Cycle, you are required to comply with the conservation and monitoring and reporting requirements contained in sections 6-1902 and 6-1904. If your large scale power plant produces or is designed to produce more than 25 megawatts of electricity by utilizing an internal combustion engine in which the expanding gases from the combustion chamber drive the blades of a turbine which turns a generator to produce electricity, you are required to comply with the conservation requirements and monitoring and reporting requirements contained in sections 6-1903 and 6-1904. If applicable, you must comply with the applicable conservation requirements set forth in the Attachment C4 beginning January 1, 2019 and continuing until the first compliance date for any substitute requirements in the Fifth Management Plan.

If you are an industrial user who uses water at a large-scale cooling facility as defined in section 6-2001, subsection 6 of the 4MP, you are required to comply with the conservation requirements and monitoring and reporting requirements for all large-scale cooling facilities in sections 6-2002 and 6-2003 of the 4MP. If those sections apply to you, they are enclosed herein as Attachment C5 and are incorporated into this notice by reference. If applicable, you must comply with the conservation requirements set forth in the Attachment C5 beginning January 1, 2019 and continuing until the first compliance date for any substitute requirements in the Fifth Management Plan.

If you are a dairy operation as defined in section 6-2101, subsection 2 of the 4MP, you are required to comply with the conservation requirements and monitoring and reporting requirements for dairy operations in sections 6-2102 through 2105 of the 4MP. If those sections apply to you, they are enclosed herein as Attachment C6 and are incorporated into this notice by reference. If applicable, you must comply with the conservation requirements set forth in Attachment C6 beginning January 1, 2019 and continuing until the first compliance date for any substitute requirements in the Fifth Management Plan.

TYPE 2 WATER RIGHTS REPORT

If you are a new large landscape user as defined in section 6-2201, subsection 3 of the 4MP, you are required to comply with the conservation requirements and monitoring and reporting requirements for new large landscape users in sections 6-2202 and 6-2203 of the 4MP. If those sections apply to you, they are enclosed herein as Attachment C7 and are incorporated into this notice by reference. If applicable, you must comply with the conservation requirements set forth in the Attachment C7 beginning January 1, 2019 and continuing until the first compliance date for any substitute requirements in the Fifth Management Plan.

If you are an industrial user that begins using more than 100 acre-feet of water for an industrial use after January 1, 2019, you must comply with the conservation requirements for new large industrial users in sections 6-2301 through 6-2302 of the 4MP. If those sections apply to you, they are enclosed herein as Attachment C8 and are incorporated into this notice by reference. If applicable, you must comply with the conservation requirements set forth in the Attachment C8 beginning no later than 180 days you begin using more than 100 acre-feet of water for industrial purposes, or the date you receive this notice, whichever is later, and continuing until the first compliance date for any substitute requirements in the Fifth Management Plan.

This notice is being sent to each non-irrigation grandfathered rightholder and groundwater withdrawal permit holder. If more than one right or permit serves your facility, you may receive multiple copies of this notice. If you receive multiple copies, please note that the conservation requirements in each notice are identical, and that they apply to your facility operation as a whole, rather than to the rights or permits individually.

If you change or expand the purposes for which you use water, you may fall into a new industrial user category. If so, you will be given notice of the conservation requirements applicable to that industrial user category and you will be required to comply with those requirements by the date specified in the notice. Copies of the requirements for other industrial categories are available upon request from Ryan Jackisch at 602-771-8585 or on ADWR's website: <http://www.azwater.gov/azdwr>. The entire 4MP may be viewed at the locations listed in Attachment E.

You have the right to seek administrative relief from the conservation requirements established in the 4MP. You also have the right to seek judicial review of the Director's Order adopting the 4MP. The following is a description of your rights.

Administrative Relief

The Director has found the conservation requirements in the 4MP to be equitable for most water users. However, there are two separate methods for seeking administrative relief from the conservation requirements if you believe you will be unable to comply with the requirements. You may request a VARIANCE or an ADMINISTRATIVE REVIEW.

1. VARIANCE

A person who requires additional time to comply with a new conservation requirement may apply to the Director for a VARIANCE from the requirement pursuant to A.R.S. § 45-574. The Director may grant a variance for up to five years upon a showing of "compelling economic circumstances." An application for a variance must be filed within 90 days after the date you receive this notice.

TYPE 2 WATER RIGHTS REPORT

2. ADMINISTRATIVE REVIEW

If you feel that a conservation requirement is unreasonable as applied to you, you may apply for an ADMINISTRATIVE REVIEW of the requirement pursuant to A.R.S. § 45-575. An application for administrative review under A.R.S. § 45-575 must be filed within 90 days after the date you receive this notice.

An administrative review may also be applied for at any time during the fourth management period if extraordinary circumstances not in existence as of the date of this notice make it unreasonable to require your compliance with a conservation requirement. If these circumstances should arise during the third management period, please contact Ryan Jackisch at 602-771-8585 for information and application procedures.

Judicial Review

In addition to seeking administrative relief through a request for an administrative review, you may seek judicial review of the Director's order adopting the 4MP pursuant to A.R.S. § 45-114(C). Any action for judicial review must be filed within 35 days after your receipt of this notice.

If you have any questions regarding your conservation requirements or if you need an application form and information on the Administrative Review procedures, please call Ryan Jackisch at 602-771-8585.

Sincerely,

Clint Chandler

Re: Type 2 Non-Irrigation Grandfathered Right No. 58-102237.0001

Dear Right Owner:

Enclosed is your Certificate of Type 2 Non-Irrigation Grandfathered Groundwater Right (Type 2 Right). **The Certificate specifies the annual amount of groundwater that may be withdrawn pursuant to your Type 2 Right and the location of the well(s) from which you are authorized to withdraw groundwater.**

Supporting information for your right is on file at the Department and is available upon request. **Remember, only the amount of groundwater allotted for the right may be withdrawn pursuant to the right.**

This is also an Official Notice of Conservation Requirements and Monitoring and Reporting Requirements that applies to your non-irrigation use. These requirements were established in the Third Management Plan ("TMP") and became effective on January 1, 2002.

As a person using groundwater not supplied by a city, town or private water company for a non-irrigation use, you are classified as an **industrial user**. You are required to comply with the conservation requirements and monitoring and reporting requirements for all industrial users in Chapter 6 of the TMP. Those requirements are set forth in the enclosed *Attachment TMP-All Industrial Users*.

Additional specific requirements have been established in the TMP for the following industrial users: turf-related facilities, sand and gravel facilities, power plants, dairy operations and cattle feedlot operations, large-scale cooling facilities and new large landscape users.

Should your intended industrial use fall under any of the above referenced additional specific requirements, you are also required to comply with them. If an additional attachment is enclosed, it is because the Department reviewed your application and determined that your intended industrial use does fall under one of the additional specific user requirements.

You must begin complying with the TMP conservation requirements set forth in the applicable attachment(s) upon commencement of groundwater use at your facility, and continue complying with the requirements until the effective date of any substitute requirements in the Fourth Management Plan.

Please note that the conservation requirements in this notice apply to water use at your industrial facility, rather than to this Type 2 Right or any other withdrawal authorities associated with this facility.

Printed on recycled paper. Each ton of recycled paper saves 7,000 gallons of water.

TYPE 2 WATER RIGHTS REPORT

You have the right to request a variance and, in some limited circumstances, an administrative review for relief from the conservation requirements. Please refer to the enclosed Variance and Administrative Review Insert for more information.

As provided in A.R.S. § 45-604 and § 45-632, any person withdrawing groundwater from a well pursuant to a Type 2 Right is required to use a water measuring device to record rates of withdrawal in order to provide or allow the computation of an annual volume of pumpage from the well(s). The total volume of pumpage shall be reported on an **Annual Water Withdrawal and Use Report** on a calendar year basis. Please refer to the enclosed Annual Report Insert for more information.

As the owner of a Type 2 Right, you are reminded that the Department must be notified if the right owner(s) changes his or her mailing address, conveys ownership of all the right to another person or changes the point(s) of withdrawal, leases all or a portion of the right to another person or changes the place or purpose of the use. If a Type 2 Right is conveyed, the full amount of the right is conveyed for a non-irrigation use. **A Type 2 Right may not be conveyed for an irrigation use.** A Type 2 Right that is used for purposes of mineral extraction or processing, or for purposes of electrical generation may be conveyed only for the same use. Forms and information relative to these matters are available upon request or on our website at www.azwater.gov.

Every reasonable effort has been made to ensure that the information contained herein and on all accompanying documents is accurate. However, if you believe errors have been made, or if you have any questions, please contact the Groundwater Permitting and Wells Section at 602-771-8500.

Sincerely,

Michael Johnson, Assistant Director

TYPE 2 WATER RIGHTS REPORT

ARIZONA DEPARTMENT OF WATER RESOURCES

ANNUAL REPORT INSERT

Persons holding groundwater rights in Active Management Areas as of December 31 of each year are required to file an annual water withdrawal and use report (annual report) for that calendar year. This annual report must be filed no later than March 31 of the following year, and must account for water withdrawn and used for the entire calendar year. Persons with more than one right must file a separate annual report for each right. Annual report forms are made available via the Department's web site (www.azwater.gov), or mailed by the Department upon request. Failure to receive the proper forms does not relieve a person from the requirement to file.

If you own an Irrigation Grandfathered Right that obtains all water from an irrigation district, that district may file an annual report on your behalf. Check with your irrigation district to determine whether they intend to file on your behalf.

MEASURING DEVICES

All water pumped from non-exempt wells in Active Management Areas must be measured with a device approved by the Department. In general, the methods include: 1) installation of an in-line or "totalizing" meter (two discharge measurements must be taken annually but results need not be submitted unless the meter malfunctions); 2) a minimum of two well discharge rate measurements per year to be used in conjunction with energy consumption measurements (this method may not be used if the energy meter serves uses other than the well); and 3) a minimum of two discharge rate measurements per year to be used in conjunction with an approved hour meter. A copy of the measuring rules may be obtained upon request from the Department.

Devices must be installed and maintained to insure that measurement error does not exceed 10%. The pump and discharge system on a well must be so constructed to allow the Department, with its own devices, to check the accuracy of the installed device.

Persons withdrawing groundwater pursuant to an Irrigation Grandfathered Right and one or more Non-Irrigation Rights or Withdrawal Permits must use a sufficient number of devices to allow for the separate measurement of the amount withdrawn pursuant to the Irrigation Grandfathered Right.

If a device malfunctions for a period of more than 72 hours, the malfunction must be reported to the Department within seven days of discovery of the malfunction. Repair or replacement of the device must be made within 30 days or as soon as practicable. Measuring device malfunction reports may be obtained from the Department.

Exceptions to the measurement requirement are made only for persons holding Type 2 Non-Irrigation Grandfathered Rights or Groundwater Withdrawal Permits with aggregate allotments of ten acre-feet or less. Persons with such rights or permits may estimate annual withdrawals.

RECORD KEEPING

Records of annual water withdrawal, delivery and use calculations must be maintained for at least three years. In the event that you are selected for a records audit, you will be asked to provide this information.

FEES

Withdrawal fees are assessed for each acre foot of water annually withdrawn from wells associated with groundwater rights. This fee is annually set by the Director of the Department each October for the following calendar year. These fees must be included with annual report filings.

Annual reports not filed by the March 31 deadline are subject to late filing penalties of \$25.00 for each month or portion of a month that the annual report has not been filed up to a maximum of \$150.00. In addition, late payment fees of 10% per month to a maximum of 60% are assessed for any withdrawal fees not paid by March 31.

CHANGES IN OWNERSHIP

The Department must be notified if the person named in the Certificate changes his or her mailing address, conveys ownership of all or a part of the land to another person or wishes to convert the irrigation rights to a non-irrigation right. If you have questions regarding the Certificate or conveyance procedures, please the Groundwater Permitting and Wells Section. Forms and information relative to these matters are available on the Department website at www.azwater.gov

IMPORTANT NOTICE

VARIANCES AND ADMINISTRATIVE REVIEWS

The Arizona Department of Water Resources (Department) has found the conservation requirements to be equitable for most water users. However, if you believe you will be unable to comply with these requirements by the dates specified you may request a variance. A variance may be granted for up to five years if there are "compelling economic circumstances" preventing timely compliance with the annual allotment assigned to your irrigation right. An application for a variance must be filed with the Department within 95 days after the date of this notice.

No new applications for administrative review will be accepted at this time, except as allowed under A.R.S. §§ 45-571.01 and 45-575(B). Under A.R.S. § 45-571.01, you may file an application for administrative review to correct factual, technical or legal errors in the establishment of your requirements only if you have reacquired the land to which your right is appurtenant involuntarily, or voluntarily in lieu of foreclosure, and you did not previously have the right to request an administrative review of the requirements. Such an application must be filed within 95 days after the date of this notice. A.R.S. § 45-575(B) allows for the filing of an application for administrative review at any time if extraordinary circumstances, which were not in existence as of the date the Department first gave notice of the Third Management Plan water duties and allotments to the owner of your land, make it unreasonable to require compliance with the water duties and allotments.

If you have questions regarding variances and administrative reviews, please contact the Groundwater Permitting and Wells Section at 602-771-8500.
